KanPERC REGULATOR REBATE PROGRAM

\$40,000.00 Available for Rebate

The Kansas Propane Education and Research Council in cooperation with the National Propane Education and Research Council has instituted a program whereby with the replacement of a regulator more than 15 years old (the manufacturer's suggested maximum lifespan) or a single stage regulator, the LP dealer may receive as a rebate the sum of \$40.00 per replaced regulator with a maximum of 30 per calendar year per location.

1. The sum of \$40,000.00 is set aside for remainder 2010 and through 2011. This program will be suspended when funds are depleted until additional funds are made available.
2. The old regulator replaced must be:
 - A. For an existing residential customer and used in a residential application. Not for a new customer or a new or replacement tank set.
 - B. 15 years old or older and in service at the time of replacement.
 - C. A single stage regulator in a single stage regulator system regardless of age.
3. The replacement regulator must be:
 - A. A new and never previously used LPG regulator, either a 2nd stage in a two stage system (containing both first and second stage regulators) or a twin stage in a single regulator system.
 - B. Purchased, installed and tested by a currently licensed LPG installer or qualified installer, not the customer.
4. The LP dealer will provide the following information on a form provided by KanPERC that will contain the following information:
 - A. The brand of the replaced (old) regulator and the model number.
 - B. The date code of the replaced (old) regulator.
 - C. The name, address and telephone number of the customer for whom the regulator was replaced. (for verification purposes)

- D. A copy of the Service Order Form (Installation Report) properly filled out and signed by the customer and the installer when the replacement was performed.
 - E. The name and number of the installer.
 - F. The name, address and telephone number of the LP dealer under whom the installer works and who is requesting the rebate.
 - G. A statement from the requesting dealer that all requirements of the regulator rebate program and all rules were met and complied with.
5. The program will begin May, 2010 and any replacement request or LPG installation report dated prior to that date will not be considered and will be denied as not timely pursuant to the rules and no rebate will be made.
 6. The replacement program is limited to one rebate per existing customer regardless of how many regulators are replaced at that one customer's location during the first rebate period.
 7. Each Class One dealer in the State of Kansas may apply for thirty (30) regulator rebates per calendar year per manned office locations. In all cases, when the total of the allotted rebate funds for that year is exhausted, all rebates thereafter will be denied for lack of funds. There will be no request carry over from year to year. Funds not paid out as rebates will be carried over and added to the next year's total. The program for each year will end when all funds are exhausted.
 8. Requests for rebates will be made on a Rebate Request form provided by KanPERC and will be accompanied by all required documentation. If an application is incomplete for any reason, the request will not be considered and will be denied with no notice to the requesting dealer.
 9. Replaced regulators shall NOT be sent to KanPERC or to the Propane Marketers Association of Kansas but will be disposed of properly by the LP dealer.
 10. As original signatures are required, **all requests for rebates will be mailed** to:

KanPERC-Rebate Request
501 SE Jefferson St.
Suite 2000
Topeka, KS 66607

Fax requests shall not be made and will be denied. The Rebate Request Form can be obtained from the KanPERC office and is available on our website:
